

Mikumi National Park Tanzania

WELCOME TO MIKUMI NATIONAL PARK

Sharing a common border and ecosystem with Selous Game Reserve to the south, Mikumi National Park is only three to four hours drive from Dar es Salaam, lying astride the main highway to Zambia, and en route to the National Parks of Udzungwa Mountains, Ruaha and Kitulo. The main feature of the park is the Mikumi flood plain, along with the mountain ranges that border the park on two sides. Open grasslands dominate in the flood plain, eventually merging with the miombo woodland covering the lower hills.

Mikumi National Park covers an area of 3,230 sq km, and is rich in wildlife including buffalo, wildebeest, zebra, lion, elephant, impala, hippos, baboon, giraffe, warthog, waterbuck and eland which can be viewed throughout the year. Reptiles including crocodile, monitor lizard and python are also resident in the park. Other animals that can be sighted although rare are the Sable Antelope resident in the southern part of the park bordering the Selous, the Greater Kudu, leopard, and the wild dog also known as the African Hunting Dog. More than 400 bird species have been recorded, including European migrants during the rainy season.
